

## 03-FORM02.HTML source

```
<!--  
  Imagine that your school is hosting an inter-school IT fair. Design an HTML form for accepting registrations.  
  The form page should contain facility to enter:  
    * School name * User name * Password * Mobile phone no.  
  It should also contain a button for saving and clearing the details entered  
-->  
  
<html>  
  <head> <title> Registration - Interschool IT Fair </title> </head>  
  
  <body>  
    <!-- Students can ignore style tag -->  
    <style>  
      body {font-family: Fantasque Sans Mono, Ubuntu Mono, monospace;}  
      input { width:10em; height:2em; margin:0.2em;}  
    </style>  
  
    <h1>Registration - Interschool IT Fair</h1>  
  
    <form name=form1 action=register.php method=POST>  
  
      School name: <input type=text name=school_name> <br>  
      User name   : <input type=text name=user_name> <br>  
      Password    : <input type=password name=pw> <br>  
      Repeat Password: <input type=password name=pw2> <br>  
      Mobile No.   : <input type=text name=mobile> <br> <br>  
  
      <input type=submit value=Submit> <input type=reset value=Clear>  
  
    </form>  
  </body>  
</html>
```
